PROFILE

Full-stack developer and Software Engineering student at Adama Science and Technology University (ASTU). Designs, builds, and deploys complete web applications: React and Vue.js frontends, Node.js/Express and Laravel backends, SQL and NoSQL databases (MySQL, MongoDB, PostgreSQL/Supabase, Firestore), secure authentication (JWT, Sanctum), and RESTful APIs, with live deployments on Vercel. Currently a Software Engineering Intern at Omishtu Software Company, building production features across the stack within professional Git workflows. Passionate about solving real-world problems through technology and continuously learning new tools and frameworks.

WORK EXPERIENCE

Software Engineering Intern | Omishtu Software Company

2026 – Present

- Developing full-stack features end to end: Laravel backend services and REST APIs with Vue.js and React.js frontends
- Testing and documenting APIs with Postman and Thunder Client
- Collaborating through Git branches, pull requests, and code reviews in a professional team setting

PROJECT EXPERIENCE

Full-Stack Developer | RecallAI (FlashGEN AI) — AI Flashcard App

2026

- Built and deployed a full-stack AI flashcard app (spaced repetition) with a React 19 + TypeScript frontend (Vite, Tailwind CSS) and an Express.js server; live on Vercel
- Integrated the Google Gemini API for AI-generated flashcards; stored user data in Firebase Firestore with configured security rules

Full-Stack Developer | WeddingPass — Digital Invitations & QR Ticketing

2026

- Built and deployed a platform for digital wedding invitations, RSVP tracking, and QR-code venue check-in using React 18, TypeScript, Vite, Tailwind CSS, and Supabase (PostgreSQL, auth, Row-Level Security); live on Vercel
- Implemented guest management, organizer notifications, an attendance analytics dashboard (Recharts), and PNG/PDF invitation export

Full-Stack Developer (Backend Focus) | ASTU Complaint & Issue Tracking System

2026 – Present

- Built a complaint management platform for ASTU using React, Node.js, Express, and MongoDB Atlas
- Designed secure JWT authentication with role-based authorization (student, department, admin), file uploads (Multer), and email notifications (Nodemailer, Mailtrap)
- Developed analytics and RESTful APIs following MVC architecture, plus a Gemini-assisted chatbot endpoint that guides users through the complaint process

Backend Developer | Student Marketplace — Team Project

2026 – Present

- Built backend APIs for a marketplace exclusive to verified university students using Node.js, Express, and Prisma ORM; implemented secure JWT-based authentication and authorization
- Migrated the database from SQLite to MongoDB Atlas, restructuring the schema for scale

Developer | Campus Food Ordering & Delivery App — Team Project

2026

- Contributed to a mobile platform (Expo/React Native) backed by a Node.js, Express, and Prisma REST API: vendor browsing, delivery or dine-in ordering, delivery-agent approval, order tracking, and ratings

Full-Stack Developer (Backend Focus) | Role-Based User Management System (RBAC)

2026 – Present

- Developed a role-based access control system using Laravel, Vue.js, and MySQL
- Implemented user, role, and permission management with Laravel Sanctum and the Spatie Permission package; built RESTful APIs for user administration following SRS and MVC principles

Full-Stack Developer | HarmonyHub — Music Analysis Web App

2026 – Present

- Designing a web app that analyzes uploaded songs to detect musical key, chords, harmony, and scale using React and Node.js; building the analysis dashboard and automatic chord/key detection and metadata extraction

Full-Stack Developer | Student Registration System

May 2026 – Present

- Built a student registration platform using JavaScript, Node.js, and MySQL to manage student records, integrating frontend and backend components with sound database design and software engineering principles

RELEVANT SKILLS

- Languages: JavaScript, TypeScript, Python, Java, PHP
- Frontend: React.js, Vue.js, Vite, HTML5, CSS3, Tailwind CSS, React Native (Expo)
- Backend: Node.js, Express.js, Laravel, RESTful APIs
- Databases & Cloud: MySQL, MongoDB (Atlas), PostgreSQL (Supabase), Firebase Firestore, Prisma ORM
- Auth & Security: JWT, Laravel Sanctum, Role-Based Access Control, Supabase RLS, Firestore rules
- Deployment & AI: Vercel, Google Gemini API
- Tools & Practices: Git & GitHub, Postman, Thunder Client, MVC Architecture, OOP, Data Structures & Algorithms, SDLC

EDUCATIONAL HISTORY

Studying Bachelor's Degree in Software Engineering at ADAMA SCIENCE AND TECHNOLOGY UNIVERSITY
